Reading Assignments

• You are expected to read the relevant book sections before coming to class.
• Your first reading assignment:
  Monday 21.1 – 21.3
  Thursday 21.4 – 21.7
iClickers

• During the first few minutes of each lecture I will ask questions on the reading assignment.

• Occasionally I will ask you to solve a problem for extra credit.

• I will open iClicker registration next Monday and explain how to register your clicker for this course.
Homework

• Homework is an important tool for your learning.

• To do the homework you’ll need an account on masteringphysics and the courseID: "RUPHYS227SP17"

• Assignments will be posted every Monday and will be due the following Saturday at 11:59PM.

• If you are observing religious holidays, please complete your MasteringPhysics homework in advance (the deadline is the same for all students).

• For questions on Homework/MasteringPhysics e-mail your recitation instructor.
MasteringPhysics

• CourseID: RUPHYS227SP17

• Assignment 0: Introduction to MasteringPhysics is optional. If you do it, it will replace the lowest homework grade.

Pre-Post Testing

• Students before you have done this to improve this course. Now is your turn to help those that will come after you.

• You are not expected to know every (or any) correct answer but do enter what you think. Use your understanding from previous physics courses.

• After you are done return the answer sheet with the questionnaire.
